Preventive medicine for data disruption

House, Don; Winkler, Ray
Telephony v231n23 PP: 46-48 Dec 2, 1996
ISSN: 0040-2656 JRNL CODE: TPH
WORD COUNT: 700

ABSTRACT: Ameritech's current network configuration required **digital**

data services to connect through a central office channel bank that multiplexes services, monitors circuits and...

...among other duties. With the advent of digital services, even a slight disturbance in the **digital data** stream would, at best, cause users to **retransmit** to ensure a successful data transfer. At worst, an interruption would create a failed connection forcing users to reconnect their data link. Until now, Ameritech has attempted to **limit** the number of service disruptions by minimizing the number of **digital data** channel units installed in a channel bank. As additional data services are introduced, the amount...

...increased interest in finding a way to perform routine maintenance. Ameritech has recently introduced innovative **uses** of existing technology in several of its region's central offices to solve this problem.

CBS turns to Viacom for cable help

Flint, Joe

Broadcasting & Cable v123n38 PP: 12 Sep 20, 1993

ISSN: 1068-6827 JRNL CODE: BRO

...ABSTRACT: network Viacom International on a new programming service. CBS had been looking at starting a **news** and public affairs network but is now considering a general entertainment cable network similar to Viacom's Nick at Nite. CBS's goal is to **use** its cable network as a negotiating tool that would **allow** operators paying a subscriber fee for the network to carry CBS-owned stations for free...

...Comcast. Meanwhile, NBC recently signed Continental Cablevision, the 3rd largest cable operator, to its own **retransmission** -consent plan, and Tele-Communications Inc. expects to reach **retransmission** agreements with NBC and ABC before the October 6, 1993, deadline.

REVISION DATE: 20070100

News Corp.'s MySpace, a popular social networking site, does not sell ads on the pages of individual members, but Paramount Pictures' Amy Powell, senior VP of interactive marketing at the Viacom-owned movie studio, will allow everyday people to incorporate professional-looking content into their personal webpages or computer desktops as part of an advanced Internet ad strategy. Such content widgets (which can provide auto-updating news feeds, clocks, calculators, and weather information), say Ms. Powell and many others, have potential to increase consumer eyeballs on a page because they integrate ads onto the webpage. This is a more relevant approach than banner ads, says Ms. Powell, but less irritating than video ads that glom onto the whole screen. Ms. Powell points to the importance of creating content that appeals to different audience segments wherever they are, so, for the release of the film jFreedom Writers, k Paramount has allied with Freewebs, a company that provides free website construction tools for consumers. At Freewebs' site, visitors can upload programs from a movie-themed toolset for self-expression, including a photo album, video injector, and chat. They can be used on the profile of an individual, and the widgets include references to the film, including...

...jwidgetization, k but will be followed by Reebok, and AKQA, an interactive agency, has also created a weather widget to promote Microsoft Flight Simulator X for Xbox.

...CLAIMS B1

1. A **digital contents** sales apparatus (110) for **selling a digital contents**, the apparatus comprising: a **digital contents** personal using condition definition processing unit (215) responsive to an input of identification information of...

...information of said user thus input,

wherein, said downloader is arranged to transmit, to a **digital contents purchasing** apparatus (130) related to said user, **list page** information listing the personal **using conditions** of digital contents in order to display the **digital contents** personal using conditions thus read on said **digital contents purchasing** apparatus, with said **digital contents purchasing** apparatus being coupled with said **digital contents** sales apparatus via a network, and

in response to detection of an input of information...

...re-delivery of a digital contents selected by said user from the digital

contents personal **using conditions** in said **list page** information displayed on said **digital contents purchasing** apparatus, said downloader delivers the **digital contents** thus selected if a digital contents personal using condition corresponding to the requesting information is...

...personal using conditions stored in said digital contents personal using condition management table.

2. A **digital contents** sales method for **selling a digital contents** to a user in a **digital contents** sales apparatus including a downloader for transmitting a digital contents via a network, the method comprising the steps of: receiving, from a user via the network, an input indicating **purchase** of a **digital contents** ;

storing, in a **digital contents** personal using condition management table, a digital contents personal using condition including identification information of...

...to the identification information of said user thus input; transmitting, by said downloader to a **digital contents purchasing** apparatus related to said user, **list page** information listing the personal **using conditions** of digital contents in order to display the **digital contents** personal using conditions thus read on said **digital contents purchasing** apparatus, with said **digital contents purchasing** apparatus being coupled with said **digital contents** sales apparatus via the network; and

in response to detection of an input of information...

Abstract: The Internet has provided business with an effective, exciting and more importantly dynamic alternative to traditional methods for marketing, advertising, and **selling** technical products. The wide spread connectivity and ease of **use** of the Internet have lead to an outbreak of new opportunities in the distribution of corporate information. Utilizing the World Wide Web, in its simplest form, **allows** the integration of text, graphics, **video**, and sound into a creative presentation. Advances in hardware and software technology have **allowed** the implementation of highly interactive and functional **Web sites**. Through the **use** of online forms, searchable databases, and online catalogs, companies can present and transfer unlimited amounts of information to new and potential customers with ease and better reliability than traditional methods. The evolution toward technology enhanced business solutions must not ignore the corporate legacy. Rather, the successful dynamic business solution must draw from disparate functional groups in order to preserve the investments in corporate legacy and existing enterprise systems. The successful communication of this message can not be the sole responsibility of MIS and must be in line with the company's vision. Meeting the business needs necessary to close the loop in organizational communication can not be achieved through the **use** of a static **web site**. (0 Refs)

Treatment: Applications (A); Practical (P); Theoretical (T)

Abstract: The authors have developed a methodology that takes advantages of the World Wide Web to analyse and develop optimal new product designs. The paper describes the methodology and illustrates its application to a case study involving the design of an actual **Web site** where **music** CDs are **sold**. The proposed methodology has the following features: (a) it is based on a design inspired by conjoint analysis; (b) it involves unobtrusive electronic measurement of the actual behavior of Web users who remain undisturbed by experimental factors; and (c) it utilises an integer programming approach to seek optimal **Web site** configurations. The methodology **uses limited** dependent variable methods to develop response models that provide the basis for the development of objective functions for an optimisation model. The optimisation model can consider either single or multiple objective functions by **using** a Pareto optimum approach. (32 Refs)

Treatment: Economic aspects (E)

Abstract: The Internet is proving to be a useful tool to electronics **buyers**. Many **use** the World Wide Web to research suppliers and distributors, keep abreast of technology trends, and to check out the latest **news** in the high-tech industry. However, component manufacturers

and distributors say that's just the beginning. Many predict that in the not-so-distant future, the Internet will be the common conduit by which parts are bought and **sold**. They say the Web **allows** nonvalue-added transactional parts of **purchasing** to be automated, cutting down on procurement cycle time and reducing the cost of **buying**. Most electronics distributors have **Web sites** and some of them, including Marshall Industries and Hamilton Hallmark, let **buyers** **purchase** components on-line. (0 Refs).

Conference Sponsor: USENIX Assoc

Conference Date: 15-17 Oct. 1997 Conference Location: Santa Barbara, CA, USA

Language: English Document Type: Conference Paper (PA)

Treatment: Practical (P)

Abstract: The Internet provides a medium to combine human and computational entities together for ad hoc cooperative transactions. To make this possible, there must be a framework allowing all parties (human or other) to communicate with each other. The current framework makes a fundamental distinction between human agents (who **use** HTML) and computational agents, which **use** CORBA or COM. We propose domain-specific languages (DSLs) as a means to **allow** all kinds of agents to "speak the same language". In particular, we adopt some ideas (and syntax) from SGML/XML, especially the strict separation of syntax and semantics, so each agent in a collaboration is capable of applying a behavioral semantics appropriate to its role (**buyer**, seller, editor). We develop the example of a card **game**, where the syntax of the language itself implies some of the semantics of the **game**. (12 Refs)

Title: Creative imagination and media-assisted learning: Shakespeare in performance

Author(s): Goodman, L.

Journal: Literary & Linguistic Computing vol.12, no.4 p.259-68

Publisher: Oxford University Press,

Publication Date: Nov. 1997 Country of Publication: UK

CODEN: LLCOEI ISSN: 0268-1145

SICI: 0268-1145(199711)12:4L:259:CIMA;1-Q

Material Identity Number: K925-98001

Language: English Document Type: Journal Paper (JP)

Treatment: Applications (A)

Abstract: Presents the aims of the Open University/BBC Shakespeare Multimedia Project, which has been producing new technological teaching tools on Shakespeare in performance since 1995, including a series of **video** and audio performances, television programmes, and a suite of interactive CD-ROMs in progress. The paper outlines a number of the key concerns which the team was formed to address and explains the stages of development, the forms of feedback which we have taken on board (gathered by the Institute of Educational Technology, the research and development wing of the Office of New Technology, the academic course team, and testing in the UK and North America), and the current status and output of the project. The paper begins with a statement of the central relationship that the project team sees between ideas, images and words in performance formatted for distance teaching and research. In offering a number of alternatives through the CD-ROMs and **Web site**, the work produced to date makes possible a number of imaginative connections for students and teachers of different generations and levels of experience with technology, including those with **limited** sight and hearing. The paper should be of interest to those who are concerned to look at the potential benefits of **using** new technology for what it is best at, without **buying** in wholesale to the idea that CD-ROMs or the Web should be **used** in all instances, or should replace tutor interaction in 'real' space and time as well. (6 Refs)

Material Identity Number: D448-97002

Language: English Document Type: Journal Paper (JP)

Treatment: Practical (P)

Abstract: Cable-based networks will one day **allow** for a large enough information superhighway to handle the exciting, new age of Internet-empowered retailing. But before full-motion **video Web sites** can hit homes and real-time, automatic inventory replenishment becomes a reality, the communications infrastructure to handle those exchanges will have to be built. In addition, competition between cable and telephone companies will have to drive down **usage** rates. Regional chains especially, for whom the **limited** size of the highway is a competitive disadvantage against the national chains, say they can only prepare for that day by **buying** bandwidth or optimizing existing bandwidth. (0 Refs)

Title: Grassroots: farmers embrace information age

Author(s): Petrovich, M.

Journal: Videotex World vol.1, no.1 p.4-9

Publication Date: Sept. 1984 Country of Publication: Canada

CODEN: VIWOE3 ISSN: 0823-8294

Language: English Document Type: Journal Paper (JP)

Treatment: General, Review (G); Practical (P)

Abstract: Grassroots is a farm-oriented electronic information system which **uses** Telidon terminals to provide constantly updated information on markets, weather, and other agricultural concerns to its 2000-odd subscribers. Infomart runs the service, its 270 information providers supplying the 48000 information **pages**. Infomart updates the material, and develops the service while the Manitoba Telephone System (MTS) provides the telephone wire over which the signals travel. The weather reports, updated weekly, cover the weather **conditions** in agricultural areas throughout the world and not how the crops are going, important information in view of the effect on prices and markets. Grassroots also provides various farm management programs. One of these helps to draw up a herbicide **usage** plan. In addition, there is a land **purchase** versus rental calculator and a machinery cost calculator. Although Grassroots is intended primarily to help farmers manage their businesses better, it does have other features

such as various **games** , children's programs, entertainment guides, sports results, and home shopping. (0 Refs)

Title: Software stockpickers

Author(s): Asner, M.

Journal: Canadian Business vol.57, no.9 p.138-42

Publication Date: Sept. 1984 Country of Publication: Canada

CODEN: CABUAL ISSN: 0008-3100

Language: English Document Type: Journal Paper (JP)

Treatment: General, Review (G); Practical (P)

Abstract: Five software programs and data services designed to help manage investment portfolios and available in Canada are selected from a **list** of hundreds. For stock exchange online access, ProMonitor permits the user to hook up a home computer to any of several stock exchanges for a fixed monthly fee. To gain access to electronic libraries all that is needed is a home computer together with a telephone and a modem. One of the most representative services is the Dow Jones **News** Retrieval Service. Two elements of particular interest to serious investors are financial and investment services and Dow Jones Quotes. STOX/M is typical of dozens of portfolio management programs. It is designed specifically for the personal investor and **allows** one to keep track of the costs and current values of all securities, including stocks, bonds, options; and mutual funds. Of the many graphing, charting, drawing and interpolating programs available, STOX/C is one of the best for investors. It can be **used** in conjunction with STOX/M or alone, and may be employed to obtain data manually or from an electronic library. Investment Analysis, available from Radio Shack for about \$90, runs on its own Model 100 Portable Computer. It can calculate information that is useful when **buying** or **selling** fixed-income securities and can also work out commission charges for stock and option transactions. (0 Refs)

Language: English Document Type: Journal Paper (JP)

Treatment: General, Review (G)

Abstract: Viewdata, or videotex, **uses** existing telephone lines and television sets or monitors to **permit** two-way communication with a central computer database, via landlines. Prestel-British Telecom's public information service-provides a wide scope of information ranging from **news** and sports results, weather and traffic reports, travel and shopping guides to stock exchange quotations, commodity prices, and company information. The main growth in the **use** of viewdata has been in the business market. Companies who need to communicate regularly with other branches, sales forces or companies make **use** of the electronic mail facilities, either Prestel's own Mailbox service or the more sophisticated British Telecom system, Telecom Gold. There is an increasing number of closed user groups and private viewdata services formed to provide information to specific user groups. Travel agents are particularly well serviced by videotex, not only by the travel information **pages** on Prestel but also closed user groups offering bookings of airline seats, holidays, hotels, etc. Other groups utilising these information services include antique dealers, the road haulage association, the agricultural community, health service, medical world, media **buyers**, motor dealers and public services. THREE ESSAYS IN THE ECONOMICS OF MARKETING

Author: LAU, KIN-NAM

Degree: PH.D.

Year: 1987

Corporate Source/Institution: PURDUE UNIVERSITY (0183)

Major Professor: MANOHAR U. KALWANI

Source: VOLUME 51/02-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 566. 147 PAGES

Descriptors: BUSINESS ADMINISTRATION, MARKETING

Descriptor Codes: 0338

Essay one deals with the problem of designing an optimal sales policy for a firm in a competitive, uncertain **selling** environment. Two aspects of a firm's sales policy are modeled, namely the sales compensation plan and extent of discounting from the **list** price. A two-stage **game**

-theoretic approach is used to determine optimal levels of these two control variables given competitive sales compensation and price discounting policies. In Stage I, the optimum level of sales effort expected from utility maximizing salespersons is determined given sales compensation policies of competing firms. Then, in Stage II, the optimal sales policies of the competing firms is derived given the optimal level of sales effort determined in Stage I.

Essay two deals with the optimal advertising and pricing policies, while recognizing explicitly both the competitive and dynamic nature of markets. The analysis is performed within the framework of the Nerlove and Arrow (1962) model which represents advertising as an investment in goodwill. A differential game with a symmetric profit function across the two competitors in the market is **used** to determine the optimal duopolistic advertising expenditures and pricing policies. Two cases are included. The pure advertising model includes advertising as the only marketing instrument. The general model **allows** for substitutability between advertising and pricing in formulating a marketing program.

In essay three, the principal agent theory is combined with the sample information to solve a spectrum of sales compensation problems, namely, the parameter's estimation when the sales effort levels are not observable, the design of a self-revealing contract, the design of a non-linear contract and the design of a linear contract with and without market segmentation, with and without prize motivation, with and without competition.

Inexpensive set-top boxes unleash Internet Tv

JAPAN: SET-TOP BOXES PROMOTE USE OF INTERNET TV

The Japan Times (XAO) 10 Sep 1998 P.8

Language: ENGLISH

According to the government, around 99% of households in Japan have colour TVs and 93% have telephones in Japan. Since the iBOX was released in 1996 by Japan Computer Corp, other set-top boxes had also been introduced in Japan. It is believed that the set-top boxes that enable Internet access will be installed into the TV so that no TV will be **sold** without its own built-in Internet capability. TV stations will also adjust their programs to **allow** access to Internet **pages** and text information can be readable **using** the TV's internal modem. Viewers will then be able to interact with TV programs **using** their remote controllers. This will enable viewers to respond immediately to advertisements and telephone shopping programs will be connected to online shopping sites. The iBOX is the first set-top box launched in Japan. There are different versions of the iBOX, including the Super iBOX Home for ISDN connections, iBOX-1 for general family **use** and the iBOX-1c for **use** with cable modems and dial-up routers and the Super iBOXc compatible with a keyboard and mouse. Web TV Networks began its Web TV service with Sony Corp that **sold** the set-top box. Web TV offers its own informative content, including seasonal information and it is the only set-top box that can perform all 4 main Internet services, inclusive of Net surfing, e-mail, **news** group reading and online chat. MULCO from NEC Home Electronics has a detachable digital camera that **allows** both vocal and visual information to be transmitted. It focuses on communication functions rather than Net surfing and thus it has the least options for displaying World Wide Web **pages**. However it is also the only device that can save e-mail messages for future **use**. NCTV is the first set-top box to connect Internet data closely with TV broadcasts. User can check Internet

information **using** a big portion of the display while a TV program is playing in one small part of the display.

Three new image goodies from Adobe

SINGAPORE: ADOBE TO DEBUT IMAGING SOFTWARE

Business Times (XBA) 01 Jun 1998 P.16

Language: ENGLISH

Adobe Systems Inc, an imaging software leader, will release three new products in Singapore in early July 1998. One new product is the Photoshop 5.0, the new version of the image-editing tool **used** by most creative professionals. New features consist of editable text layers, spot-colour channels, image history palette and advanced colour management support. Photoshop 5.0 will price at S\$ 1,690 and current Photoshop users can upgrade it for a **limited** period at a promotion price of S\$ 340. The second product is a new **video** editing software, Premiere 5.0, which will work on Win 95, NT and Mac. It satisfies the needs of broadcast, industrial, multimedia and Internet authors. Premiere 5.0 has been merged with Adobe's family of products and will offer **video** professionals with standard menus, palettes and keyboard shortcuts. It will be **selling** for S\$ 1,520 for new users and at S\$ 340 for upgraders. The third product is a completely new product, the ImageReady 1.0, which will help users streamline Web design and editing, and prepare images quickly for **use** on the World Wide Web. Web designers need not spend hours trying to figure out how a graphic will look like on their **Website** when seen with a different browser or computer. The product will be going for S\$ 508.

Football's coming home - to your PC

ISRAEL: NEW SYSTEM BRINGS FOOTBALL ACTION TO PC

Independent (TI) 17 Feb 1998 supp. p.7

Language: ENGLISH

A new system, VirtuaLive, will **allow** PC users to watch football on the Internet. Developed by Orad Hi Tech Systems, an Israeli company, VirtuaLive

turns broadcast **video** into computer-**game** like graphics, and **allows** viewers to manipulate the image from any angle, even from the player's viewpoint. The drawbacks at present are that the PC image is about a quarter of the monitor screen, and is not as realistic as **video**. Also, it takes about ten minutes to produce sections of the match, though by next year the company hopes to have perfected a real-time microwave tracking system **using** transponders, the size of credit cards, on each player and inside the ball. TV companies in the UK have already expressed interest in the system, which has already been bought by broadcasters in Australia, Argentina and Mexico. To help cover the costs, broadcasters can **sell** 3D billboard advertising, with links to sponsors own **web sites**.

Internet TV
SINGAPORE: WEB TV
Business Times (XBA) 26 Jan 1997 P.11
Language: ENGLISH

Philips and MyWeb have put on Singapore's market an Internet TV, a set-top box, which offers 33.6 kbps Net access via TV when the Philips-made set-top box is linked to the phone line and TV. Besides offering a pharmacy on the Net for shopping **using** an Internet small cash payment system, MCash, and the functions of the Web including e-mail and surfing, Philips and MyWeb will offer information on the business and financial industries, education and **news**. The set-top box, which will be **sold** at S\$ 599 and bundled with Singnet's Net access and e-mail accounts, will **allow** credit card payment when NTUC Fairprice, Singapore Post and IPC **sell** their products on the **website** offered by Philips and MyWeb, which is **limited** to Net account-holders.

Microsoft to launch TV internet device
US: NEW SET-TOP BOX FROM MICROSOFT
Financial Times (FT) 16 Sep 1997 p. 33
Language: ENGLISH

US-based software group Microsoft's WebTV unit has developed a set-top box device encompassing a **video** modem which will **allow** Internet **web**

pages to be created via TV signals. The WebTV Plus from WebTV, which was **purchased** in 1997 for US\$ 425mn by Microsoft, will be promoted in the US in the run-up to Christmas as well as being the subject of a European marketing push. The device is seen as an effort by Microsoft to enhance its home entertainment market presence and will enable users with the necessary equipment such as a phone line and modem to **download** selected **data** **using** a traditional TV aerial.

PBL poised for Internet deal with Microsoft

AUSTRALIA: PBL AND MICROSOFT FORM JOINT VENTURE

The Australian Financial Review (AFR) 10 Jun 1997 P.3

Language: ENGLISH

The largest magazine and television empire in Australia, Publishing and Broadcasting **Limited** (PBL), has formed a new company of equal stakes (50-50) with Microsoft. The objective of the new company is to compile Microsoft's Internet magazines and PBL's magazine and television content for **use** on the Internet in Australia. Specifically, the new venture will launch several popular **web pages** such as Expedia, Investor, Carpoint, Sidewalk and Encarta. Each of them will be described briefly as follows. Expedia is first started in North America to enable Internet users to plan and book their holidays. Investor is provided financial **news** and latest developments in the stock market. Carpoint enables users to select and **buy** their cars on the Internet. Sidewalk is a guide for leisure and entertainment facilities. Encarta is the Microsoft encyclopaedia.

ATMs WILL SOON DO MORE THAN GIVE YOU MONEY

AUSTRALIA: NEW BREED OF ATMs

The Australian Financial Review (AFR) 11 Nov 1996 P.33

Language: ENGLISH

A new breed of Automatic Teller Machines(ATMs) is born. Apart from printing new cheque books, they can enable customers to **buy** concert tickets and phone cards by mid-1997. NCR has launched a new ATM with multimedia displays. The latter can be utilised for advertising while customers are waiting for their money. In addition, the ATM can print a voucher redeemable in the supermarket housing it. Subsequently, NCR hopes to launch machines with **video** -conferencing facilities. This will enable clients to talk to the banks' staff. On the other hand, Olivetti has released ATMs which can be **used** to print, bind cum staple 20- **page** cheque books. Customers can receive them in about 30 seconds' time. Both machines do have scanning technology, **permitting** clients to deposit cash and cheques directly into bank accounts.

ROLY TIES UP WITH BLOCKBUSTER

SINGAPORE: A TIE UP BETWEEN BLOCKBUSTER & ROLY
Business Times (XBA) 16 Oct 1996 P.17
Language: ENGLISH

Listed Roly International, a global distributor of branded consumer and home decor products has entered a joint venture agreement with Blockbuster, an entertainment group from USA. Under which, the partners will co-operate to identify expansion opportunities in Asia regarding development of Blockbuster outlets. Besides this, the partners will also set a 50-50 joint venture company, to be known as Asia Retail Development **Limited** Duration Corporation. The new venture will be responsible for identifying retail opportunities in Asia. In addition, the 2 companies are also negotiating an agreement whereby Roly provides product development, merchandising, sourcing and retail distribution consultancy services to Blockbuster in Asia. Roly will also make **use** of its Taiwan and HongKong facilities to make baseball caps, gifts, T-shirts and other merchandise for Blockbuster (on a project basis). It aims to begin merchandising in Taiwan. Next on the **list** being China, HongKong, Singapore and Malaysia. Ultimately, Roly International plans to design, develop, cum supply merchandise to some 5,000 Blockbuster stores globally. Separately, Blockbuster operates a chain of outlets **selling movies and music** in USA.

In Japan, it's shop (on-line) till you drop

JAPAN: BIG BUSINESS FOR ON-LINE SHOPPING

The Nikkei Weekly (NW) 6 Dec 1993 p.8

Language: ENGLISH

Japan has over 2 mn subscribers to the personal computer communications networks, which **allow** users to shop for a variety of products from food to pop **music**. NEC Corp., which started to **sell** a **music** software on 17 November 1993 via its PC-VAN PC communication network, provides around 300 popular **songs** and theme **music** from animated films at the price of Y 350 (USD 3.21) per copy. It sells 500 copies of the **music** software daily and the number of **songs** available is expected to rise to 2,000 by the end of the next fiscal year. Another leading PC communications network operator Nifty Corp. begun an "on-line shopping" service at end-1992 via its Nifty-Serve network. The service's **usage** rose in July 1993 by 70% from June 1993 when the firm added condoms to its **list** of merchandise. It

expects to see its sales doubled from 1992 to 1993. Nifty president Tomoo Okada said on-line shopping will become a key service provided via the PC communication networks. Already, there are 560,000 subscribers for the network and it is growing at the rate of 10,000 per month.

Potential of colour

EUROPE - PROFILE OF PHOTOCOPIERS

Financial Times (C) 1991 (FT) 8 October 1991 pIV

Europe: this article, part of a 8 **page** FT survey on Office Technology, looks in detail at photocopiers. Last month (09.91) Rank Xerox ended speculation about its re-entry into the colour market when it announced the planned arrival of the Xerox 5775 digital colour copier 16 years after its first attempt. But success is more assured this time, since competitors are already in the market, creating awareness of the various colour technologies on offer. The unprepossessing brand name for the new Xerox machine belies the fact that it represents true state of the art. Some four years in the making, it promises a copy rate of 10 per minute in colour, three times that in black and white; and the ability to produce immediately usable colour copies on overhead projection film by virtue of a newly developed ink that ensures the image does not smudge. But what really sets the Xerox 5775 apart from the rest is the full-colour, touch screen **video** control monitor which makes **use** of icons for easy access to all the facilities. Market consultant BIS Strategic Decisions believes that a major spur to growth will be increased **use** of colour PC monitors and colour printers. Already colour monitors account for two-thirds of the European market, with over 1.7m units in 1989, and a projection of 4m in 1993. Until the sub-GBP10,000 colour copier arrived, the cost of colour technology made it **prohibitive** for inplant **use**. Now, it can even be considered a departmental **purchase**. Table shows: Europe's installed colour copiers 1989-94. Some companies mentioned: Fuji, HCS, Kodak, Minolta. (Abstract)**

SOFTWARE **ALLOWS USE** OF CLC 500 WITH MACKINTOSH

FRANCE - SOFTWARE **ALLOWS USE** OF CLC 500 WITH MACKINTOSH

Zero Un Informatique Hebdomadaire (ZH) 22 June 1990 p118

Language: French

Anten-A (Meylan, France) has developed Fugue, software which enables the Canon CLC 500 printer/photocopier/scanner to be used with Macintosh machines. Anten-A is the only company in the world to have developed such a product, which has aroused the interest of Canon Europe and Canon Japan as well as Canon France. Thirty- five Canon CLC 500 machines have been **sold** in France, and twenty- five users have also bought the FFr33k Fugue software, including Canon, Thomson, Gaz de France and Matra. When used with the image processing unit of the FFr270k CLC 500, the Fugue software can capture a wide variety of documents including A4 and A3 images, slides, photographs and **video** film images. Designed as an integrated colour image production system for small scale printing applications, the Canon CLC 500 provides a resolution of 400 points dpi and handles 5 A4 **pages** /minute and 3 A3 **pages** /minute.

... content, even at a very basic level. Take for example a typical 14
year old **music** fan, an ideal target for **purchasing on - line music**
content . That person will not have a credit card, so no matter what
secure commerce system...
